War in the Age of Enlightenment, 1700-1789 Armstrong Starkey 2003 War in the 18th century war was a complex operation, including popular as well as conventional conflict, between Europeans and with non-Europeans. These conflicts influenced European intellectuals and contributed to the complexity of Enlightenment thought. While Enlightenment writers regarded war as the greatest evil confronting mankind, they had little hope that it could be eliminated; thus, peace proposals of the day were joined by more realistic discussion of the means by which war might be limited or rendered more humane. In this book, the author considers the influence of ideas and values on the actions of Enlightenment military personnel and how the rational spirit of the time influenced military thought, producing a military enlightenment that applied rational analysis to military tactics and to the composition of armies. In the late Enlightenment, military writers explored the psychological foundations of war as a means of stimulating a new military spirit among the troops. The Enlightenment was, however, not the only cultural influence upon war during this century. Religion, the traditional values of the ancien regime, and local values all contributed to the culture of force. When Europeans engaged in military encounters with peoples in other parts of the globe, cultural interchange inevitably occurred as well. Further, there is a revolutionary element that one must consider when defining the military culture. The result of all these factors was a creative tension in 18th century warfare and an extraordinarily complex military culture.

The Well-Educated Mind: A Guide to the Classical Education You Never Had (Updated and Expanded) Susan Wise Bauer 2015-11-16 The enduring and engaging guide to educating yourself in the classical tradition. Have you lost the art of reading for pleasure? Are there books you know you should read but haven't because they seem too daunting? In *The Well-Educated Mind*, Susan Wise Bauer provides a welcome and encouraging antidote to the distractions of our age, electronic and otherwise. Newly expanded and updated to include standout works from the twenty-first century as well as essential readings in science (from the earliest works of Hippocrates to the discovery of the asteroid that killed the dinosaurs), *The Well-Educated Mind* offers brief, entertaining histories of six literary genres—fiction, autobiography, history, drama, poetry, and science—accompanied by detailed instructions on how to read each type. The annotated lists at the end of each chapter—ranging from Cervantes to Cormac McCarthy, Herodotus to Laurel Thatcher Ulrich, Aristotle to Stephen Hawking—preview recommended reading and encourage readers to make vital connections between ancient traditions and contemporary writing. *The Well-Educated Mind* reassures those readers who worry that they read too slowly or with below-average comprehension. If you can understand a daily newspaper, there's no reason you can't read and enjoy Shakespeare's sonnets or *Jane Eyre*. But no one should attempt to read the "Great Books" without a guide and a plan. Bauer will show you how to allocate time to reading on a regular basis; how to master difficult arguments; how to make personal and literary judgments about what you read; how to appreciate the resonant links among texts within a genre—what does *Anna Karenina* owe to *Madame Bovary*?—and also between genres. In her best-selling work on home education, *The Well-Trained Mind*, the author provided a road map of classical education for parents wishing to home-school their children; that book is now the premier resource for home-schoolers. In *The Well-Educated Mind*, Bauer takes the same elements and techniques and

adapts them to the use of adult readers who want both enjoyment and self-improvement from the time they spend reading. Followed carefully, her advice will restore and expand the pleasure of the written word.

SCM Studyguide: Philosophy and the Christian Faith Ben Pugh 2018-12-04 The challenges that Western culture keeps posing to the Christian faith are ever new. The goal-posts keep changing. This study guide will equip theology students to understand the culture-shaping beliefs that are driving the kinds of questions it brings to faith. It will be an historical overview of the key stages in the history of Western philosophy with each section carefully tracing the genealogical line of ideas and the Christian responses to them, right up to the present day. For most theology students, learning abstract philosophical concepts involves literally learning a new language, a language that the initiated converse in with ease but which leaves the uninitiated baffled. Thus, each chapter in this study guide opens with a glossary of terms. Throughout the studyguide students are encouraged to reflect on the ways in which what has been learned might be applied in both explicitly theological and wider cultural contexts - for example, they might be asked to think of a film or book that seems to express elements of existentialism or postmodernism, or to describe how something very like the extreme subjectivity of idealism can sometimes show itself in Sunday morning worship.

Child of the Enlightenment Arianne Baggerman 2009-01-01 A diary kept by a boy in the 1790s sheds new light on the rise of autobiographical writing in the 19th century and sketches a panoramic view of Europe in the Age of Enlightenment. The French Revolution and the Batavian Revolution in the Netherlands provide the backdrop to this study, which ranges from changing perceptions of time, space and nature to the thought of Jean-Jacques Rousseau and its influence on such far-flung fields as education, landscape gardening and politics. The book describes the high expectations people had of science and medicine, and their disappointment at the failure of these new branches of learning to cure the world of its ills.

The Lazy Dog's Guide to Enlightenment Beth Wilson 2011-02-09 Enlightenment doesn't always come in the form we expect. It need not appear as a self-styled guru or a complicated theory measuring some mysterious quality. Sometimes it's as close as the chocolate Lab bounding happily through the backyard or the lovable terrier contentedly curled up in one's lap. In the foreword to this thoughtful examination of enlightenment, Dr. Bernie Siegel sums it up: "Dogs are healers.

They are enlightened. They seem to have figured out how to live beautifully so much better than we humans have.” In these pages, distinctive black-and-white dog images by acclaimed animal photographer Zachary Folk are illuminated by captions of down-to-earth spiritual wisdom “from” the dogs to us, their often confused humans. A delightful romp through canine philosophy, this charming collection celebrates the simple wisdom and that special combination of natural earthiness and subtle spirituality that characterize humankind's best friend.

Narratives of Enlightenment Karen O'Brien 1997-06-05 Narratives of

Enlightenment is an interdisciplinary study of cosmopolitan approaches to the past. It reappraises the work of five of the most important narrative historians of the century - Voltaire, David Hume, William Robertson, Edward Gibbon and the historian of the American Revolution, David Ramsay - in the context of political and national debates in France, Scotland, England and America; and it investigates the nature and degree of their intellectual investment in the idea of a common European civilisation. Karen O'Brien combines the methodologies of literary criticism and intellectual history to explore debates about Enlightenments and the political uses of narrative. Where previous studies have emphasised the growth of nationalism in eighteenth-century literature, she reveals the development of cosmopolitan ways of thinking beyond national cultural issues.

Rome in the Age of Enlightenment Hanns Gross 1990 This is the only scholarly work in the English language on the city of Rome in the Age of the Enlightenment, and the only book in any language to treat this fascinating city in all its multifarious aspects. Professor Gross combines extensive archival research with the latest findings of other scholars to produce a uniquely rounded portrait of the papal capital, elegantly illustrated with contemporary engravings by Piranesi and others.

The book is divided into two sections, in the first of which Professor Gross discusses the material and institutional structures of the city, including its demography, economy, food supply, and judicial systems. The second section considers aspects of intellectual, cultural, and artistic life. Professor Gross contends not only that ancien-regime Rome witnessed a decline in Counter-Reformation fervour, but that this decay resulted in a marked dissonance in the political, social, and cultural life of the city.
