Case Files Psychiatry, Third Edition Eugene C. Toy 2009-08-14 Real life cases for the psychiatry clerkship and shelf-exam 4 STAR DOODY'S REVIEW! "During medical school, I used similar case review books for various clerkships, including psychiatry. This one stands out because the cases are representative of psychiatry, the explanations are complete yet concise, and the text uses bolded words, tables, and definitions of key terms to help readers understand the essential concepts rather than simply memorizing more data that is likely to be forgotten. The questions are very representative of the type of questions on the shelf-exams and USMLE Step 2, with appropriate descriptions of the correct answers. The first two sections are ideal for students just beginning their clerkship, as they set the groundwork for the basis of psychiatry."--Doody's Review Service You need exposure to high-yield cases to excel on the psychiatry clerkship and the shelf-exam. Case Files: Psychiatry presents 60 real-life cases that illustrate essential concepts in psychiatry. Each case includes a complete discussion, clinical pearls, references, definitions of key terms, and USMLE-style review questions. With this system, you'll learn in the context of real patients, rather than merely memorize facts. 60 high-yield psychiatry cases, each with USMLE-style questions Clinical pearls highlight key concepts Primer on how to approach clinical problems and think like a doctor Proven learning system maximizes your shelf-exam scores Jung, C.G., Psychologische typen Carl Gustav Jung 2003

De vergissing van Descartes Antonio Damasio 2019-01-18 In zijn bestseller 'De vergissing van Descartes' zet Antonio Damasio zich af tegen Descartes' opvatting dat lichaam en geest twee verschillende, van elkaar gescheiden aspecten van de mens zouden zijn. Lichaam en geest zijn juist onlosmakelijk verbonden. Damasio put uit zijn ervaringen met patiënten met hersenschade om te laten zien welke rol de emoties spelen bij de vorming van ons wereldbeeld. Een herdruk ter gelegenheid van Antonio Damasio's nieuwe boek, 'De vreemde orde der dingen', waarin hij laat zien hoe emotie en gevoel bepalend zijn voor de menselijke cultuur.

De existentialisten Sarah Bakewell 2016-11-15 'De existentialisten' van Sarah Bakewell vertelt het bewogen verhaal van een invloedrijke generatie denkers, waaronder Simone de Beauvoir, Jean-Paul Sartre en Raymond Aron. Zij speelden een cruciale rol in het verzet tijdens WO II en in emancipatiebewegingen van onder anderen feministen, antikolonialisten en studenten. Schijnbaar moeiteloos schakelt Sarah Bakewell tussen hun gepassioneerde levens en geëngageerde ideeën. Bakewell gaat op zoek naar wat de existentialisten ons te bieden hebben in een tijd waarin vrijheid en mensenrechten weer onder druk staan. Deze pageturner brengt perfecte mix van biografieën en ideeën. 'Bakewells boek is een mengsel van filosofie en biografie van de hoofdrolspelers van het existentialisme, van anekdoten en inzichten, van persoonlijke herinneringen en cultuurgeschiedenis.' – Vrij Nederland

A Compendium of Neuropsychological Tests Esther Strauss 2006-04-06 For the practicing neuropsychologist or researcher, keeping up with the sheer number of newly published or updated tests is a challenge, as is evaluating the utility and psychometric properties of neuropsychological tests in a clinical context. The goal of the third edition of A Compendium of Neuropsychological Tests, a well-established neuropsychology reference text, is twofold. First, the Compendium is intended to serve as a guidebook that provides a comprehensive overview of the essential aspects of neuropsychological assessment practice. Second, it is intended as a comprehensive sourcebook of critical reviews of major neuropsychological assessment tools for the use by practicing clinicians and researchers. Written in a comprehensive, easy-to-read reference format, and based on exhaustive review of research literature in neuropsychology, neurology, psychology, and related disciplines, the book covers topics such as basic aspects of neuropsychological assessment as well as the theoretical background, norms, and the utility, reliability, and validity of neuropsychological tests. For this third edition, all chapters have been extensively revised and updated. The text has been considerably expanded to provide a comprehensive yet practical overview of the state of the field. Two new chapters have been added: "Psychometrics in Neuropsychological Assessment" and "Norms in Psychological Assessment." The first two chapters present basic psychometric concepts and principles. Chapters three and four consider practical aspects of the history-taking interview and the assessment process itself. Chapter five provides guidelines on report-writing and chapters six through sixteen consist of detailed, critical reviews of neuropsychological tests, and address the topics of intelligence, achievement, executive function, attention, memory, language, visual perception, somatosensory olfactory function, mood/personality, and response bias. A unique feature is the inclusion of tables that summarize salient features of tests within each domain so that readers can easily compare measures. Additional tables within each test review summarize important features of each test, highlight aspects of each normative dataset, and provide an overview of psychometric properties. Of interest to neuropsychologists, neurologists, psychiatrists, and educational and clinical psychologists working with adults as well as pediatric populations, this volume will aid practitioners in selecting appropriate testing measures for their patients, and will provide them with the knowledge needed to make empirically supported interpretations of test results.

De man die zijn vrouw voor een hoed hield Oliver Sacks 2015-08-28 In De man die zijn vrouw voor een hoed hield vertelt Oliver Sacks de verhalen van mensen die lijden aan perceptuele en intellectuele afwijkingen: patiënten die hun herinneringen kwijt zijn, niet langer in staat zijn om geliefden of alledaagse voorwerpen te herkennen, of patiënten die te maken hebben met tics en die zonder dat te willen obsceniteiten schreeuwen. Hoewel deze gevallen ons vaak bizar voorkomen, worden ze door Sacks' respectvolle en sympathieke wijze van vertellen diep menselijk. Aan de hand van fascinerende en vaak ontroerende ziektegeschiedenissen laat Sacks zien hoe het is om te moeten leven met een neurologische afwijking.

Als je het licht niet kunt zien Anthony Doerr 2015-01-07 Een blind meisje te midden van het geweld van de Tweede Wereldoorlog Voor alle liefhebbers van De boekendief 'Anthony Doerr heeft een nieuwe maatstaf gehanteerd voor wat een verhaal met je kan doen.' Dave Eggers De jonge Marie-Laure is blind. Ze woont met haar vader in Parijs naast het Natuurhistorisch Museum, waar hij werkt als curator. Als Marie-Laure twaalf is bezetten de nazi's Parijs en vader en dochter vluchten naar het Bretonse Saint-Malo. Ze hebben de grootste en meest waardevolle schat van het museum meegenomen. In een Duits mijnstadje groeit Werner Pfennig op in een weeshuis samen met zijn jongere zusje Jutta. Werner belandt bij de Hitlerjugend en wordt vervolgens naar het front gestuurd. Via Rusland komt hij tenslotte in Saint-Malo terecht, waar zijn verhaal en dat van Marie-Laure samenkomen. Anthony Doerr heeft met zijn werk al vele gerenommeerde literaire prijzen gewonnen. Hij schreef tien jaar lang aan deze roman, die door de internationale pers als een meesterwerk wordt beschouwd en waarvan de filmrechten zijn verkocht aan 20th Century Fox. Anthony Doerr woont met zijn vrouw en twee jonge zoons in Boise, Idaho. 'Zijn imponerende gevoel voor detail en prachtige metaforen zijn overweldigend.' San Francisco Chronicle 'Doerr schildert met een rijk prozapalet dat resoneert als een klok en lang blijft hangen in je hoofd.' Daily Mail 'Absoluut betoverend.' The Guardian 'Hij kan een scène tot leven wekken in één enkele alinea.' The Times

Psychology and Parenthood Jean Gross 1989 Throughout the 1980s, the National Health Service has been the subject of almost continuous re-organization and constant political debate. Its sheer size and complexity, however, baffled most attempts at systematic description and analysis. This is a guide to the way the NHS works. Based on anthropological research behind the scenes in seven district health authorities, it features first-hand accounts of the age old methods of administration and the new attempts at business-style management. It will be of interest not only to health service professionals and academics in social policy, public administration and health studies, but also to anyone interested in our changing national health service.
