Electrical Wiring Stephen L. Herman 2018-08-09 The sixth Canadian edition of Electrical Wiring: Industrial is based on the 2018 Canadian Electrical Code. Beyond an accurate interpretation of CEC requirements, the successful completion of any wiring installation requires the electrician to have a thorough understanding of basic electrical principles, a knowledge of the tools and materials used in installations, familiarity with commonly installed equipment and its specific wiring requirements, the ability to interpret electrical construction drawings, and a constant awareness of safe wiring practices. Electrical Wiring: Industrial builds on the knowledge and experience gained from working with the other texts in the NELSON electrical wiring series and related titles. The basic skills developed in previous applications are now directed to industrial installations. The industrial electrician is responsible for the installation of electrical service, power, lighting, and special systems in new construction; for the changeover from old to new systems in established industrial buildings; for the provision of additional electrical capacity to meet the growth requirements of an industrial building; and for periodic maintenance and repair of the various systems and components in the building.

Electrical Wiring Ray C. Mullin 2012-08-22 Nelson Education is pleased to present the only Canadian Electrical Wiring Series on the market. This sixth Canadian edition of Electrical Wiring: Commercial takes the reader through the essential requirements for commercial installations as set forth in the 2012 edition of the Canadian Electrical Code, Part I (CEC), the safety standard for electrical installations. Because Electrical Wiring: Commercial is both comprehensible and readable, it is suitable for colleges, technical institutes, and vocational technical schools. The student requires a reasonable level of mechanical aptitude and skills in order to be successful in the practical application of the techniques discussed. The chapters are sequenced to introduce the student to the basic principles and wiring practices contained within a commercial building. Included in the text is information to introduce the reader to the Workplace Hazardous Material Information System (WHMIS) and to fire safety in commercial applications being covered.
