History of Construction Cultures Volume 2 João

Mascarenhas-Mateus 2021-07-08 Volume 2 of History

of Construction Cultures contains papers presented at

the 7ICCH – Seventh International Congress on

Construction History, held at the Lisbon School of

Architecture, Portugal, from 12 to 16 July, 2021. The

conference has been organized by the Lisbon School

of Architecture (FAUL), NOVA School of Social

Sciences and Humanities, the Portuguese Society for

Construction History Studies and the University of the

Azores. The contributions cover the wide

interdisciplinary spectrum of Construction History and

consist on the most recent advances in theory and

practical case studies analysis, following themes such

as: - epistemological issues; - building actors; -

building materials; - building machines, tools and

equipment; - construction processes; - building

services and techniques ; -structural theory and

analysis ; - political, social and economic aspects; -

knowledge transfer and cultural translation of

construction cultures. Furthermore, papers presented

at thematic sessions aim at covering important

problematics, historical periods and different regions of the globe, opening new directions for Construction History research. We are what we build and how we build; thus, the study of Construction History is now more than ever at the centre of current debates as to the shape of a sustainable future for humankind. Therefore, History of Construction Cultures is a critical and indispensable work to expand our understanding of the ways in which everyday building activities have been perceived and experienced in different cultures, from ancient times to our century and all over the world.

Biogeochemistry of Ancient and Modern Environments P. A. Trudinger 2013-06-29 This volume contains a selection of papers presented to the Fourth International Symposium on Environmental Biogeochemistry (ISEB), and a conference on Biogeochemistry in Relation to Mining Industry and Environmental Pollution (Leaching Conference), held in Canberra, Australia on August 26-31 and September 3-4, 1979, respectively. The ISEB were established to provide "a forum for uninhibited exchange of information and ideas among the biological, chemical, atmospheric and geological scientists working in the common area of biogeochemistry, encompassing soil and other earth sciences as well as the hydrosphere and atmosphere", By linking the fourth ISEB with the Leaching Conference the scope of discussions was extended to encompass the application of biogeochemical processes to the mining industry. This wide-ranging philosophy is reflected in the breadth and diversity of

the subjects covered in this book. The published papers are expanded versions of those presented at the meetings. They have all been scrutinized by at least one referee in addition to the editors. About 20% of the contributions to the meetings are not included, either because authors did not wish to publish or because the papers were not accepted by the editors.

Seismic Design and Practice into the Next Century
Edmund Booth 2022-05-05 The papers, from 18 countries in Europe and elsewhere, contain discussions of quite radical innovations in material technology, design philosophy, experimental techniques and analytical approaches that will affect seismic design practice into the next century. Papers are organised into 9 sections: Ground motion and seismic hazard studies; Seismic design of foundations; Seismic design of steel, concrete and masonry buildings; Seismic design of offshore, nuclear and petrochemical installations; Seismic design of bridges, dock and power station structures; Repair and strengthening of bridges and buildings; Active and passive methods of seismic control; Dynamic testing methods; Seismic codes of practice. The proceedings will provide essential material for all those from both industrial and research organisations needing to keep in touch with the state-of-the-art in earthquake engineering and related earth sciences.
