Remaking the American College Campus Jonathan Silverman 2016-10-03
The built and landscaped spaces of colleges and universities radiate and absorb the values of the cultures in which they were created. As economic and political forces exert pressure on administrators and as our understanding of higher education shifts, these spaces can transform dramatically. Focusing on the utopian visions and the dystopian realities of American campus life, this collection of new essays examines campus spaces from the perspective of those who live and work there. Topics include disability, sustainability, first-year writing, underrepresented groups on campus, online education, adjunct labor, and the way profit-driven agendas have shaped colleges and universities.

Collaborative Practice Connie Healy 2017-09-19 Collaborative practice is a new method of dispute resolution, used mainly in family law matters. By taking a non-adversarial approach, it challenges the strictly positivist view of the lawyer as 'zealous advocate' for the client. As such, it has received much criticism from the established Bar and legal profession. This book provides a doctrinal and empirical analysis of collaborative practice with a view to assessing its place within the dispute resolution continuum and addressing whether this criticism has been justified. It begins by establishing the theoretical underpinnings of conflict and differing approaches to conflict resolution, the impact of the comprehensive law movement and therapeutic jurisprudence. The origins and development of the collaborative process and the framework it provides for a multidisciplinary approach to conflict resolution is outlined. The book addresses the examination of the process undertaken in the lead up to the enactment of the Uniform Collaborative Law Act in 2010; now regarded as a model of best practice. Finally, through an examination of empirical research undertaken in the US, Canada and in England and Wales, and in presenting the results of the first known empirical research into the process in an Irish family law context, the book concludes with an evidenced based analysis of the process from the perspective of couples who chose to use the collaborative model to resolve the issues surrounding their relationship breakdown, collaborative lawyers and lawyers who do not advocate a non-adversarial approach. As such this book provides a valuable insight into the process which will be of interest to: academics; practising lawyers; members of the judiciary; researchers in the fields of conflict resolution and family law and for students studying alternative dispute resolution (ADR).

Superstorm Sandy Diane C. Bates 2016-01-18 Sandy was the costliest hurricane in U.S. history after Katrina, but the waters had barely receded from the Jersey coast when massive efforts began to "Restore the Shore." Why do people build in areas open to repeated natural disasters? And why do they return to these areas in the wake of major devastation? Drawing on a variety of insights from environmental sociology, Superstorm Sandy answers these questions as it looks at both the unique character of the Jersey Shore and the more universal ways that humans relate to their environment.

Diane C. Bates offers a wide-ranging look at the Jersey Shore both before and after Sandy, examining the many factors—such as cultural attachment, tourism revenues, and governmental regulation—that combined to create a highly vulnerable coastal region. She explains why the Shore is so important to New Jerseyans, acting as a key cultural touchstone in a state that lacks a central city or even a sports team to build a shared identity among the state's residents. She analyzes post-Sandy narratives about the Jersey Shore that trumpeted the dominance of human ingenuity over nature (such as the state's "Stronger than the Storm" advertising campaign) or proclaimed a therapeutic community ("Jersey Strong")—narratives rooted in emotion and iconography, waylaying any thought of the near-certainty of future storms. The book also examines local business owners, politicians, real estate developers, and residents who have vested interests in the region, explaining why the Shore was developed intensively prior to Sandy, and why restoration became an imperative in the post-storm period. Engagingly written and insightful, Superstorm Sandy highlights the elements that compounded the disaster on the Shore, providing a framework for understanding such catastrophes and preventing them in the future.

This collection of new essays examines the

network from a variety of perspectives, with a focus on inclusive programming that has created a space for underrepresented communities like transgender youth, overweight teens, and the deaf.

Guilty Admissions Nicole LaPorte 2021-02-23 This entertaining exposé on how the other half gets in tells the shockingly true story of the Varsity Blues scandal, and all of the crazy parents, privilege, and con men involved. Guilty Admissions weaves together the story of an unscrupulous college counselor named Rick Singer, and how he preyed on the desperation of some of the country's wealthiest families living in a world defined by fierce competition, who function under constant pressure to get into the "right" schools, starting with pre-school; non-stop fundraising and donation demands in the form of multi-million-dollar galas and private parties; and a community of deeply insecure parents who will do anything to get their kids into name-brand colleges in order to maintain their own A-list status. Investigative reporter Nicole LaPorte lays bare the source of this insecurity—that in 2019, no special "hook" in the form of legacy status, athletic talent, or financial giving can guarantee a child's entrance into an elite school. The result is paranoia, deception, and true crimes at the peak of the American social pyramid. With a glittering cast of Hollywood actors—including Felicity Huffman and Lori Loughlin—hedge fund CEOs, sales executives, and media titans, Guilty Admissions is a soap-opera-slash-sneak-peek-behind-the-curtains at America's richest social circles; an examination of the cutthroat world of college admissions; and a parable of American society in 2019, when the country is run by a crass tycoon and all totems of status and achievement have become transactional and removed from traditions of ethical restraint. A world where the rich get whatever they want, however they want it.

The Grain-Free, Sugar-Free, Dairy-Free Family Cookbook Leah Webb 2019-05-13 Including One Month of Kid-Friendly Meal Plans and Detailed Shopping Lists to Make Life Easier As the rate of chronic illness skyrockets, more and more parents are faced with the sobering reality of restrictive diets. And because everyone is busy, many families come to rely on store-bought "healthy" products to make life simpler, but many of these are loaded with sugar and hidden toxins. When faced with her own family health crisis, mother and health coach Leah Webb realized that in order to consistently provide high quality food for her family, nearly 100 percent of their meals would need to be homemade. But when she looked for a resource to guide her, most cookbooks that offered recipes "free" of allergenic foods were also high in processed starches, flours, and sugar. Webb, like so many parents, was looking for a cookbook that offered deeply nutritious, kid-friendly, whole foods recipes that were also easy, but there wasn't one—so she wrote it herself. The Grain-Free, Sugar-Free, Dairy-Free Family Cookbook offers a new system to preparing food and approaching the kitchen that gets kids involved in cooking, which encourages excitement around food (a major challenge with restrictive diets). The recipes are rich in healthy fats, nutrient-dense vegetables, ferments, and grass-fed meats, and include snacks, school lunches, and delicious sweet treats that rival the flavors of sugar-dense desserts. By following Leah's meal plans, parents will be sure to please everyone in the family and make cooking on a restrictive diet enjoyable and doable over a long period of time. Families that know they would like to rid themselves of grain, sugar, and dairy, but are intimidated by starting, will find Webb's advice and troubleshooting invaluable. The cookbook outlines family-tested methods that make for effective and efficient preparation, including everyday basic recipes that will become part of a cook's intuitive process over time. The best part is that although Leah prepares nearly every single one of her family's breakfasts, lunches, dinners, and snacks using whole food ingredients, she only spends four to six hours on food preparation per week! Through stocking her freezer, prepping the kitchen, shopping and cooking in bulk, and consistently planning

meals, this diet plan is not only possible; it is manageable and fulfilling. Prepare for this cookbook to radically change your life.

Global Cities Robert Gottlieb 2017-05-19 How Los Angeles, Hong Kong, and China deal with such urban environmental issues as ports, goods movement, air pollution, water quality, transportation, and public space. Over the past four decades, Los Angeles, Hong Kong, and key urban regions of China have emerged as global cities—in financial, political, cultural, environmental, and demographic terms. In this book, Robert Gottlieb and Simon Ng trace the global emergence of these urban areas and compare their responses to a set of six urban environmental issues. These cities have different patterns of development: Los Angeles has been the quintessential horizontal city, the capital of sprawl; Hong Kong is dense and vertical; China's new megacities in the Pearl River Delta, created by an explosion in industrial development and a vast migration from rural to urban areas, combine the vertical and the horizontal. All three have experienced major environmental changes in a relatively short period of time. Gottlieb and Ng document how each has dealt with challenges posed by ports and the movement of goods, air pollution (Los Angeles, Hong Kong, and urban China are all notorious for their hazardous air quality), water supply (all three places are dependent on massive transfers of water) and water quality, the food system (from seed to table), transportation, and public and private space. Finally they discuss the possibility of change brought about by policy initiatives and social movements.

Suspended For Life C. Twiggy Billue 2014-07-16 "SUSPENDED FOR LIFE" takes an empirical look via real experiences at how Zero Tolerance Policies contained in the schools "Code of Conduct" disregards the rights of the student, especially students with disabilities. These policies are failing students everywhere including my residence of Syracuse New York. Statistically these unfair "Zero Tolerance Policies" have led to very high suspension rates affecting mainly, inner-city students but

overwhelmingly target students with IEPs, 504 Accommodations, the "untested but suspected LD student" and the intellectually gifted student. Healthcare, Mental Health and Medical Privacy (HIPAA) now play large roles in school especially in decisions to suspend a student however coupled with a school districts Code of Conduct they have become a crucial aspect for suspension. Once you understand the link between a referral to "In-School-Suspension (ISSwarehousing students) or a referral for Out-of-School Suspension (OSS—push out of students) you will realize that in most cases suspension can lead directly to the prison industrial complex for our young women and men. Stopping this from happening to your student may depend on how well you are prepared to advocate for your child. We must not allow suspension to push out our children because ostensibly it may be ensuring them a life sentence of unemployment, crime, or even death. We say it starts at home with the parents, so if we can better understand our student's rights and the rights we have as parents we can better prepare ourselves to advocate for our student and to hold the school district accountable for the Education of Our Children!

A Framework to Guide Selection of Chemical Alternatives National Research Council 2014-10-29 Historically, regulations governing chemical use have often focused on widely used chemicals and acute human health effects of exposure to them, as well as their potential to cause cancer and other adverse health effects. As scientific knowledge has expanded there has been an increased awareness of the mechanisms through which chemicals may exert harmful effects on human health, as well as their effects on other species and ecosystems. Identification of high-priority chemicals and other chemicals of concern has prompted a growing number of state and local governments, as well as major companies, to take steps beyond existing hazardous chemical federal legislation. Interest in approaches and policies that ensure that any new substances substituted for chemicals of concern are assessed as carefully and thoroughly as possible has also burgeoned. The overarching goal of these approaches is to avoid regrettable substitutions, which occur when a toxic chemical is replaced by another chemical that later proved unsuitable because of persistence, bioaccumulation, toxicity, or other concerns. Chemical alternative assessments are tools designed to facilitate consideration of these factors to assist

stakeholders in identifying chemicals that may have the greatest likelihood of harm to human and ecological health, and to provide guidance on how the industry may develop and adopt safer alternatives. A Framework to Guide Selection of Chemical Alternatives develops and demonstrates a decision framework for evaluating potentially safer substitute chemicals as primarily determined by human health and ecological risks. This new framework is informed by previous efforts by regulatory agencies, academic institutions, and others to develop alternative assessment frameworks that could be operationalized. In addition to hazard assessments, the framework incorporates steps for life-cycle thinking - which considers possible impacts of a chemical at all stages including production, use, and disposal - as well as steps for performance and economic assessments. The report also highlights how modern information sources such as computational modeling can supplement traditional toxicology data in the assessment process. This new framework allows the evaluation of the full range of benefits and shortcomings of substitutes, and examination of tradeoffs between these risks and factors such as product functionality, product efficacy, process safety, and resource use. Through case studies, this report demonstrates how different users in contrasting decision contexts with diverse priorities can apply the framework. This report will be an essential resource to the chemical industry, environmentalists, ecologists, and state and local governments.

Mindful America Jeff Wilson 2014 Jeff Wilson explores the diverse ways in which the Buddhist-derived practice of mindfulness meditation has been applied in American culture.

Promoting Public Mental Health and Well-being Catherine J. Mackereth 2014-11-21 What causes a person to flourish or languish? Or to be well or ill? How can the mental health and well-being of society as a whole, and individuals, be promoted and enhanced? This book explores the social, economic, political, cultural and environmental factors that affect mental health and well-being on a societal and individual level, and how prevention and intervention can enhance mental health. Taking a holistic approach to mental health, the book sets out effective strategies, from creating a supportive environment to building personal skills. Three extended case studies demonstrate how principles can be applied in practice in different situations: a specific social problem (suicide); a population group (young Black and minority ethnic groups); and a medically defined problem (people with long term conditions). The book is a vital resource for strategic planners (including commissioners) working to promote mental health and wellbeing at a population level, as well as operational services delivering to specific individuals and groups. This is the first book designed for university and high school teachers who want to integrate queer history into the standard curriculum. With its inspiring stories, classroom-tested advice, and rich information, it is a valuable resource for anyone who thinks history should be an all-inclusive story. Understanding and Teaching U.S. Lesbian, Gay, Bisexual, and

Transgender History offers a wealth of insight for teachers. Introductory essays by Leila J. Rupp and Susan K. Freeman make clear why queer history is important and provide global historical context, showing that same-sex sexual desire and gender change are not new, modern phenomena. Teachers in diverse educational settings provide narratives of their experiences teaching queer history. A topical section offers seventeen essays on such themes as sexual diversity in early America, industrial capitalism and emergent sexual cultures, and gay men and lesbians in World War II. Contributors include detailed suggestions for integrating these topics into a standard U.S. history curriculum, including creative and effective assignments. A final section addresses sources and interpretive strategies well-suited to the history classroom. Taken as a whole, *Understanding and Teaching U.S. Lesbian, Gay, Bisexual, and Transgender History* will help teachers at all levels navigate through cultural touchstones and political debates and provide a fuller knowledge of significant events in history. A History of Archaeological Tourism Margarita Díaz-Andreu 2020-02-24 This book examines the relationship between archaeological tourism and professional archaeology. To do so, it explores the connection – most visibly through nationalism and global capitalism - from its origins in the early modern period to World War II. How separate is the development of archaeological tourism from that of the formation of archaeology as a discipline? And do the fields operate in two different worlds? Scholarly discussions have largely treated them as distinct fields with no connection, while histories of archaeology, in particular, have focused on aspects such as the history of archaeological discoveries, archaeological thought and, more recently, the political relationship between archaeology and nationalism and other ideologies. Largely missing from all these accounts has been an examination of how archaeology has been incorporated into society, for example through something that all humans enjoy – leisure – in the form of archaeological tourism. Moreover, just as histories of archaeology have largely ignored the connection between archaeology and tourism, so too has tourism in the reverse direction. Recent studies on tourism have centered on topics such as economy (sustainable and recession tourism) and new types of tourism (including ecotourism and medical tourism).

The Kind Mama Alicia Silverstone 2014-04-15 The bestselling author of *The Kind Diet* offers practical solutions for a healthier, more vibrant approach to new motherhood When did making babies get to be so hard? Infertility is on the rise globally, affecting as many as one in six couples. But instead of looking at diet and lifestyle as key factors, doctors are racing to pump their patients full of expensive and invasive fertility treatments. Once pregnant, women just accept that carrying a baby will be the gassy, swollen, irritable, sleepless nightmare that has become the new normal. Once their babies are born, they assume it will be just as challenging—from breastfeeding woes to screaming fits and constant trips to the doctor.

It doesn't have to be that way. In *The Kind Mama*, Alicia Silverstone shows that if we kick nasty foods that fight our bodies and replace them with nutrient-rocking "clean" foods that heal and nourish, we can create a more positive baby-making experience, from conception through the third trimester (and beyond). By encouraging basic diet and lifestyle modifications and drawing on wisdom from medical experts, friends, and her own experience, Silverstone has created a one-stop guide that empowers women to take charge of their fertility and pregnancy, and helps them to embark on a healthier, more vibrant path to parenthood.

The Restoration of the Roman Forum in Late Antiquity Gregor Kalas 2015-04-15 In *The Restoration of the Roman Forum in Late Antiquity*, Gregor Kalas examines architectural conservation during late antiquity period at Rome's most important civic center: the Roman Forum. During the fourth and fifth centuries CE—when emperors shifted their residences to alternate capitals and Christian practices overtook traditional beliefs—elite citizens targeted restoration campaigns so as to infuse these initiatives with political meaning. Since construction of new buildings was a right reserved for the emperor, Rome's upper echelon funded the upkeep of buildings together with sculptural displays to gain public status. Restorers linked themselves to the past through the fragmentary reuse of building materials and, as Kalas explores, proclaimed their importance through prominently inscribed statues and monuments, whose placement within the existing cityscape allowed patrons and honorees to connect themselves to the celebrated history of Rome. Building on art historical studies of spolia and exploring the Forum over an extended period of time, Kalas demonstrates the mutability of civic environments. *The Restoration of the Roman Forum in Late Antiquity* maps the evolution of the Forum away from singular projects composed of new materials toward an accretive and holistic design sensibility. Overturning notions of late antiquity as one of decline, Kalas demonstrates how perpetual reuse and restoration drew on Rome's venerable past to proclaim a bright future.

Fashion, Dress and Post-postmodernism José Blanco F. 2021-01-28 Scholars have argued that postmodernism is dead and that we are entering into a new era that some have labelled altermodernism, digimodernism, performatism, and post-postmodernism. This book expands on the nascent scholarship of post-postmodernism to highlight how dress, fashion, and appearance are reflections of this new age. The volume starts with a discussion of fashion, subjectivity, and time and an analysis of temporality, technology, and fashion in post-postmodern times. Later chapters analyse the work of design houses and mass producers such as Vetements, Gucci, and Uniqlo whose products align with post-postmodern aesthetics, hyperconsumption, and hypermodern branding. The book looks at diverse geographic and identity markers by discussing post-postmodernism and the religio-politico-cultural questions in South Asian Muslim fashion, image and identity presentation in queer social networking apps, and by exploring fashion designer Tom Ford's output as a movie director. Two chapters discuss the post-postmodern fashion exhibition with analyses of recent exhibitions and an in-depth look at the work of exhibition maker Judith Clark. The final chapter is written by members of The Rational Dress Society, a counter-fashion collective that makes JUMPSUIT, an experimental garment to replace all clothes. *Fashion, Dress, and Post-postmodernism* is a companion to research on relationships between post-postmodernism, fashion, and dress, and the go-to resource for researchers and students interested in these areas.
